

How to Operate

No. 460 TRUCK TRANSPORT SET

FOR "O" AND "027" TRACK

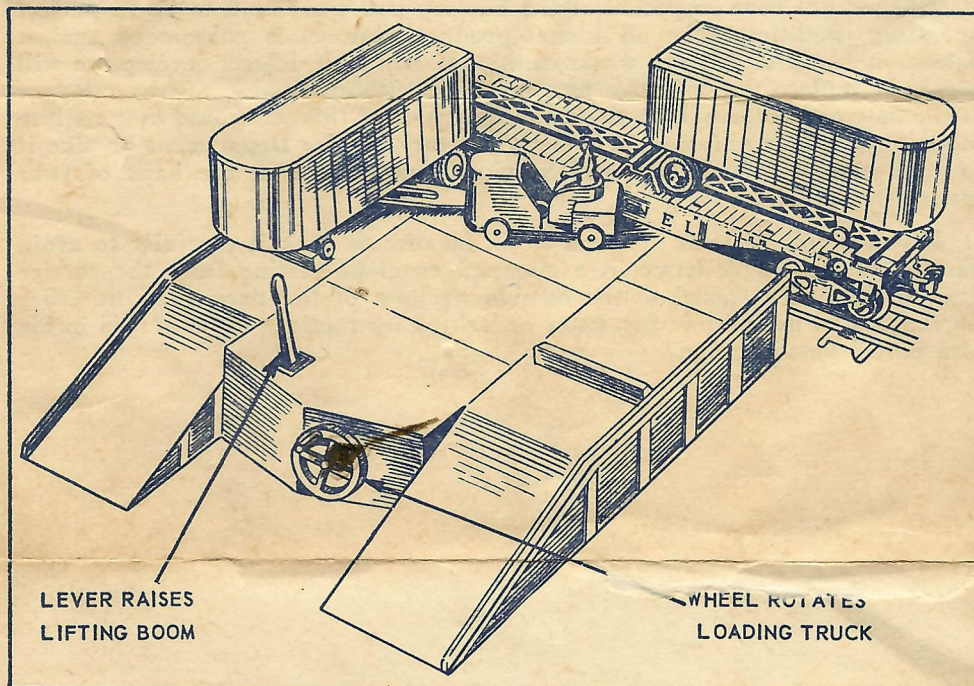

Figure 1—No. 460 Truck Transport Set

No. 460 Truck Transport Set is modeled on a new type of equipment recently introduced by many large railroads to provide "door-to-door" freight transportation service and in this way to meet the competition of the long haul truck lines.

No. 460 Transport Set consists of a special flat car, a pair of truck trailers and a loading and unloading platform. For an extended point-to-point delivery service on your railroad extra platforms, flat cars and trailers are available from your Lionel dealer.

INSTALLATION OF THE PLATFORM

The platform can be located along side of any straight stretch of track or siding within the reach of the operator. To maintain the proper distance between the platform and the track a track rail must fit into the slots of the two locating arms which swivel from the platform base.

The platform does not have any electrical connections but is operated manually. The side of the platform facing the operator has two controls. The hand wheel on the right controls the pivoting action of the lift truck in the center of the platform. The hand lever on the left raises and lowers the lifting boom. Combined action of these two controls can lift and swing the trailers from the loading platform to the flat car.

To load or unload the trailers from the platform to the car or vice versa stop the car in front of the platform. Then turn the hand wheel until the lift boom is under the trailer. (A pair of projections on the bottom of the trailers show the correct position.) Move the lever to raise the lift boom with the trailer upon it, swing them to the desired position and then lower the trailer into place and swing out the boom in the same direction for the next operation.

LIONEL WARRANTY

This set has been inspected at the Factory and was found to be in perfect operating condition. Like all Lionel products this set is guaranteed against defects in material and our workmanship. If any such defects develop we will repair or replace the defective part or parts, without charge, within one year of the date of purchase. If in the future any part of this set should ever require servicing you may either send it to the Factory Service Department or take it to your nearest Lionel Approved Service Station listed in the back of your instruction booklet.

If you decide to mail the item to us, be sure to pack it carefully to avoid damage in transit. A letter in a stamped envelope stating fully the service desired must be fastened to the outside wrapper of the package. Post Office regulations do not permit any letter or written instructions to be placed inside of a parcel post package.
